

Cal Maps the Ants

Cal has a pad and pen.

Cal and Dad sit by the
window.

Black ants march past.

Cal can watch the ant path.

The ants zig and zag.

Cal maps each ant track.

A fast ant runs past sand.

A black ant runs past grass.

Cal adds each path.

The black ants turn left.

Then the black ants turn back.

Cal adds that to the map.

An ant drags a small snack.

The ant drags it past Cal.

Cal marks that path on the map.

Dad asks, "Can ants get back?"

Cal taps a path on the map.

"That path can get them back."

The ants march back to grass.

Cal and Dad clap.

Cal has mapped each ant
path.

Cal packs the map and pad.

Dad and Cal stand back.

The black ants march past.
